

CARBON REDUCTION PLAN

June 2026

Supplier name: Cluster Greens Limited

Publication date: 30 June 2026

Commitment to achieving Net Zero

Cluster Greens Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021/22	
Additional Details relating to the Baseline Emissions calculations	
Baseline emissions were calculated in line with the GHG Reporting Protocol Corporate Standard, using the appropriate Government (DESNZ/DEFRA) conversion factors for greenhouse gas company reporting. This was the first year Cluster Greens Limited measured its emissions in full and has therefore been adopted as the fixed baseline against which all future reporting years are compared.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	2.85
Scope 2	1.95
Scope 3 (Included Sources)	10.20
Total Emissions	15.00

Current Emissions Reporting

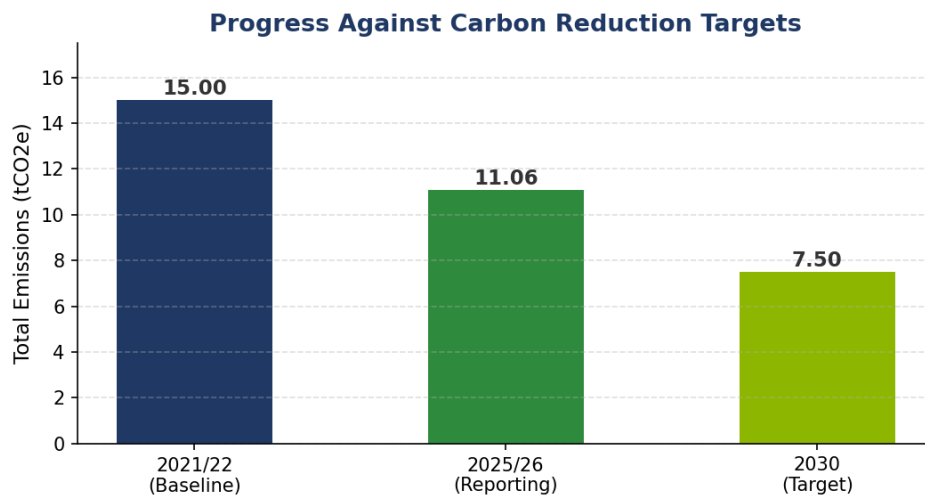

Reporting Year: 2025/26	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	2.10
Scope 2	1.35
Scope 3 (Included Sources)	7.61
Total Emissions	11.06

Emissions reduction targets

In order to continue our progress to achieving Net Zero, Cluster Greens Limited has adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 7.50 tCO₂e by 2030. This is a reduction of 50% against our 2021/22 baseline.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021/22 baseline. The carbon emission reduction achieved by these schemes equates to 3.94 tCO₂e, a 26% reduction against the 2021/22 baseline, and the measures will remain in effect when performing the contract.

These include: adoption of a hybrid working model across the consultancy team, reducing office energy consumption and commuting-related emissions; prioritising cloud-based and virtual collaboration tools for client engagements, reducing the need for business travel to client sites; switching the London office electricity supply to a renewable-backed tariff; moving toward a paperless office culture, with documentation and project records held in the cloud; use of LED lighting and energy-efficient fittings across office premises; and introduction of a Cycle to Work scheme and season ticket loans to encourage low-carbon commuting.

In the future we hope to implement further measures such as:

Transitioning any remaining company vehicles to electric or hybrid alternatives as leases expire; formalising a Sustainable Procurement Policy requiring key suppliers to demonstrate their own carbon reduction commitments; working toward ISO 14001 (Environmental Management System) certification; and further consolidating business travel bookings to prioritise rail travel over domestic flights.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard, and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Jazeena Jazeem
